Education

University of Illinois Chicago

Ph.D. in Electrical and Computer Engineering, GPA: 4.0/4.0.
Advisor: Ahmet Enis Cetin (IEEE Fellow)

Chicago, Illinois, USA
August 2019 – August 2023

University of Illinois Chicago

Master in Electrical and Computer Engineering, GPA: 4.0/4.0.

Chicago, Illinois, USA
August 2017 – May 2019

Chang'an University

Bachelor in Automation, GPA: 85.3/100 (3.6/4.0).

Xi'an, Shaanxi, China
September 2014 – July 2018

Work Experience

Northwestern University

Postdoctoral Research Fellow. Advisor: Ulas Bagci.

Topic: Federated learning, domain generalization, eye-tracking-based medical image analysis.

Chicago, Illinois, USA
June 2023 – Present

InnoPeak Technology (OPPO US Research Center)

Engineering Intern. Advisor: Xihua Dong.

Topic: Attention-based variable rate super-sampling (VRSS) for graphics rendering.

Bellevue, Washington, USA
May 2022 – August 2022

University of Illinois Chicago

Teaching Assistant and Research Assistant. Advisor: Ahmet Enis Cetin.

Topic: Wildfire detection, ℓ_1 -norm kernel PCA, orthogonal-transform-based neural network layer.

Chicago, Illinois, USA
August 2019 – May 2023

Research Interests

Machine learning, signal processing, biomedical image analysis

Editorial Services

Associate Editor, Signal, Image and Video Processing

June 2023 – Present

Selected Honors and Awards

UIC Graduate Student Award for Exceptional Research Promise

May 2022

Teaching Experience

Guest lecturer at Northwestern University

BME 495: Deep Learning for Biomedical Imaging

Spring 2024

Teaching assistant at University of Illinois Chicago

ECE 266: Introduction to Embedded Systems

Fall 2019

ECE 317: Digital Signal Processing I

Spring 2020, Summer 2021

ECE 407: Pattern Recognition I

Spring 2022

ECE 415: Image Analysis and Computer Vision I

Fall 2020, Fall 2021, Fall 2022

ECE 491: Digital Speech Processing

Fall 2020, Fall 2021, Fall 2022

ECE 491: Introduction to Neural Networks

Spring 2021, Spring 2022, Spring 2023

Selected Research Projects

Federated Domain Generalization for Medical Image Analysis

June 2023 – Present

The goal of this effort is to develop a Federated domain generalization for medical image analysis tasks. We improved the main-stream Fourier-transform-based domain generalization using a soft-thresholding function. Preliminary work is presented in [C16].

Eye-Tracking-Based Medical Image Analysis

February 2023 – Present

The goal of this effort is to develop an AI system to integrate computer-aided detection and diagnosis systems with radiologists' perceptive knowledge and patterns via eye-tracking. In [C11], we use eye gaze as a novel interactive prompt by leveraging the real-time interactive prompting feature of META's Segment Anything Model (SAM) for image segmentation. We present the GazeSAM system to enable users to collect target segmentation masks by simply looking at the region of interest. In [C13], we proposed a novel gaze-guided graph neural network (GazeGNN) for chest X-ray image classification.

Orthogonal Transform Based Neural Network Layers

March 2021 – April 2023

We proposed a family of orthogonal-transform-based neural network layers based on the convolution theorem. Related peer-reviewed papers include [J4, C3, C5, C6, C8, C9].

L_1 -Norm Kernel PCA

March 2021 – May 2023

We proposed a family of multiplication-free ℓ_1 -norm kernel principal component analysis (PCA) methods. Related peer-reviewed papers include [J5, C2, C4, C10].

Neural Network Based Wildfire Detection

May 2018 – January 2021

We deployed a MobileNet-V3-based real-time wildfire detection model on Nvidia Jetson Nano. It obtained satisfactory results on the HPWREN wildfire surveillance database. Related peer-reviewed papers include [J1, J3, C1].
